

Alaska

Alaska is the best. It has the best camping and snowboarding, skiing and biggest mountains plus it has the very best fishing. I mean it's known for its fishing right. But I mean I was born in Alaska so I think it's the best.

Alaska means to me!!

Alaska means to me... my home, my family. This is where I was born. I love Alaska. Alaska means to me summer, snow, sledding, fishing that is what Alaska means to me!

What Alaska means to Treinity

Alaska is my home. Alaska is where I was born and raised. Alaska is where I play tag, hide and seek, and snowball fights. Alaska is where my friends live. I'm proud of Alaska because it's the biggest state. I think it's the best state. It's where my family live and where I go to school. Alaska is my home.

What Alaska Means to Me

What Alaska is to me, it is a state full of history. Like in 1760 Russia came and made natives slaves. The natives got mad and said, "I'll blow up four of your ships". And they did. Also in 1867 the Russians sold Alaska for 7.2 million dollars. That's not all though, in 1882 they made Juneau our new capital. And there was also used to be a land bridge from Alaska to Russia. I love Alaska and all its history.

How Whales came to live in water

Along long time ago in Alaska whales lived on land but some of the whales complained. Then the king said 'what are you complaining about?' One brave whale came forth and said

im getting dry so we should go live in the water and then all the other whales agreed. Then the king said we will try the water first to make sure the water is safe. He tried the water to make sure it was safe. When he saw it was peaceful and quiet! Then the king came back and said I saw a few crechers in the water so let me go back and ask if they will share there home with us. So the next day the king went back to the water and asked the the fish and the seales and the oters plus the bluga whales if they could live in the water with them. And they al said yes you may.

Why Whales Spray Water

Many years ago, whales did not have a spout to spray water. Once, a selfish lady went down to the shore to get 50 Fish for her village of 50 people. "That is not enough for me," thought the lady. I will go and pretend to be polite at dinner. I will prepare the dinner, but after dinner I will go out to the sea to get a whale because I haven't enough food. So the lady went to search for a whale. They also got their book of spells, for they knew magic. They used a certain spell that summoned the whale. They said the spell, and it summoned the biggest whale they had ever seen. So the lady caught the whale, but she didn't notice the spell also created a spout on top of its head. It was still alive when it got in the boat. The whale got mad and sprayed the lady and killed her and her family. Now, whales spray water from their spout.
